

<u>MoSCoW Principles</u>	
Must Have	Should Have
Ability to input user selection for rock paper scissors Ability to have computer (CPU) choose their own selection Display the winner of the “round” Display the total wins of user for example Human 5 CPU 3	Correct choice from both sides Winner from the options Correct result: Rock beats paper, etc Keep looping until the score limit has been reached. Error handling
Could Have	Won't Have
Some kind of GUI	Any user information not associated with the program No bad language
